ProChem® Basins

ProChem® Basins are designed to provide secondary containment for tanks and meets or exceeds EPA's 49 CFR secondary containment requirements.

These economical open containment basins are designed for one or two tanks (depending on model) and are available with or without an elevated base made of rugged corrosion-resistant fiberglass grating to keep your tanks above liquids and sediment that may accumulate in some installations. Made from rugged polyethylene with ultra-violet inhibitors, ProChem® Basins will last for many years in the harshest environments. All of our tanks meet or exceed the EPA's requirements for secondary containment under 49-CFR.

* Kit includes (4) Grating Supports - All Non-Metallic

ChemFeed™ Bin

Gemini® ChemFeed™ Bin is designed to safely contain your single-walled process tank and provide an integral mounting surface for Chemical Feed pumps or other equipment.

Available in two sizes, the Gemini® ChemFeed™ Bin can accommodate tanks from 5 to 200 gallon sizes and up to four (4) metering pumps. Also designed for integral mounting of an optional PCS 2.1 Pump Containment Shelf to protect your pumps from the environment and workers from chemical exposure from leaking pumps or tubing.

The integral molded channels automatically divert any leaks from pump platform into the containment area to prevent unwanted hazardous materials discharge. Multiple tanks can be installed in the larger sizes for safe containment of more than one tank. Exceeds EPA 49 CFR secondary containment requirements.
